Fastenal Fast Order Pad
The Fast Order Pad allows for 10-key entry, and the capability to order using customer part numbers.

With over 1600 store locations in the United States, Canada, Puerto Rico, Singapore, and Mexico...

We Are Where You Are

Online ordering guide

WELCOME!

"Growth through Customer Service" is our motto, and the principle that drives all employees at Fastenal. We encourage innovation, and ideas for new products.

As we understand the need to provide an easy and convenient method of ordering and delivering our products to you, we also understand that it can sometimes be confusing for people who aren't as computer savvy as others.

For that reason, this guide was developed to answer your questions about ordering our products directly from our Website.

From registering for a new account, to placing your order and reviewing your past orders, we've provided the instructions here!

Of course, after reviewing this guide, you still have questions, please feel free to contact your local Fastenal store representative!

Logging into Fastenal.com

The first thing necessary to begin using our website is logging onto our site at www.fastenal.com. This will bring you to the home page where you can begin browsing for product.

Signing Into Online Account

If you already have an online account you can log in using the user name and password you established and click 'Submit'.

Sign In

Username:

Password:

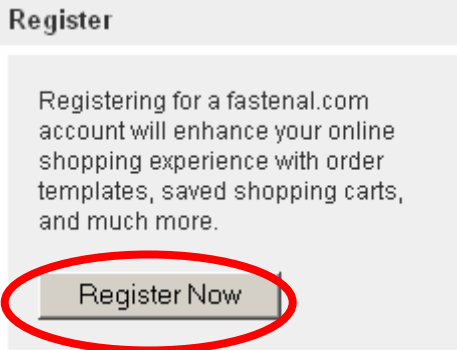

[Forgot your password?](#)

Remember Me?

If you have forgotten your user name or password, you can click on the 'I lost my password' link and we will email the information to you.

First-Time Users/Registering for a New Account

If you are a first-time user to Fastenal.com and do not have an online account you can set one up by clicking on 'Register Now'.

When registering for a new account, you will have the following two options:

Register

Create a new Fastenal Account

I have an existing Fastenal Store Account Number:
[How do I find my Account Number?](#)

I do not have a Fastenal Store Account Number

 Your information will be sent using our standard server.

If you already do business with Fastenal and wish to view your pricing online it is very important that you select option one and put your current customer account number in the field provided. This number can be found on the left-hand of your last Fastenal invoice or by contacting your local Fastenal representative.

Fastenal.com Help

Topic: How to find your Account Number

Your Account Number can be found on any Packing Slip or Invoice you receive from Fastenal. Refer to the image below for an example.

Entering Contact and Login Information

Upon registration you will be prompted to enter in contact information as well as selecting the login credentials necessary for using Fastenal.com. By allowing you to choose your user name and password it will be much easier to remember.

Once this information is entered and submitted you officially have a Fastenal.com online account. Every time you visit the Fastenal.com site you can simply log on using your login credentials and are ready to shop.

Fast Order Pad

The Fast Order Pad allows for easy order entry, featuring the 10-key entry functionality. This is most beneficial if you have a list of part numbers and quantities that you need to order. Instead of having to browse for the product, you simply click on the Fast Order Pad (icon available on homepage or Products page), enter in the parts and quantities and they are added to the Shopping Cart.

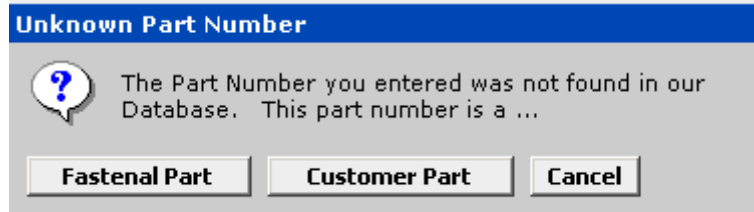

YOU ARE

Fast Order Pad

Part Information		^ Required Field	
^ Sku:	<input type="text"/>	<input type="button" value="Lookup"/>	
Description:	<input type="text"/>	Price:	<input type="text"/>
Qty Per Pkg:	<input type="text"/>	^ No. of Pkgs:	<input type="text"/>
			<input type="button" value="Add to Cart"/>
			<input type="button" value="Shopping Cart"/>

If you type in a part number that is not active on Fastenal.com either because it is a non-standard number or a customer number you will get prompted with the following message.

If it is a customer part number that we have cross referenced at the store level, the local Fastenal representative will be able to click a button in the eCommerce tab in their POS system that will bring in the Fastenal part number automatically.

Finding and Selecting Products

There are multiple ways to search for products on Fastenal.com.

You can search by:

- Product Number (SKU) Search
- Cross-reference (Competitor or Manufacturer) Search
- Keyword(s) Search
- Fastener dimensional Search
- Browse Product Categories

If you know the part number that you are looking for or have a specific keyword you would like to search on you can simply type the part number or keyword into the Search field at the top of the screen. This will search the site for Fastenal part numbers, competitor part numbers, and manufacturer part numbers containing the part number or text entered into the Product Search field.

Each technique is described in detail below.

Product Number (SKU) Search

If you know the Fastenal part number that you are looking for simply type the part number or SKU into the Search field. Results matching your search will be returned.

Cross-reference (Competitor or Manufacturer) Search

The Cross-reference search works very similarly to the Product Number search. Enter the Manufacturer or Competitor's Part Number into the Search Field. If a cross-reference exists, your part will be returned in the record set. Currently Fastenal has over 140,000 Competitor's cross-references to streamline your product search.

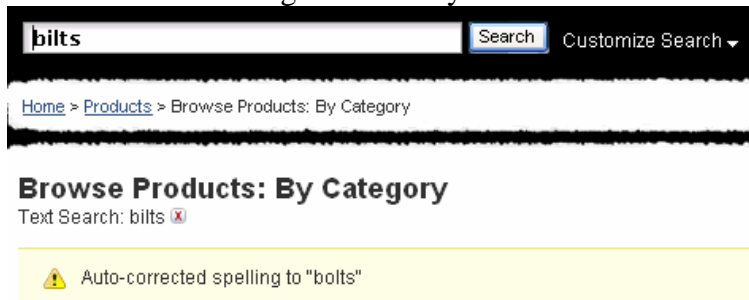

Keyword(s) Search

Enter key words specific to the product you are searching for. Results will be returned based on the relevancy of the result, or in the order of the best matches. The Fastenal Keyword search takes advantage of advanced technologies such as spell correct and Did You Mean (DYM).

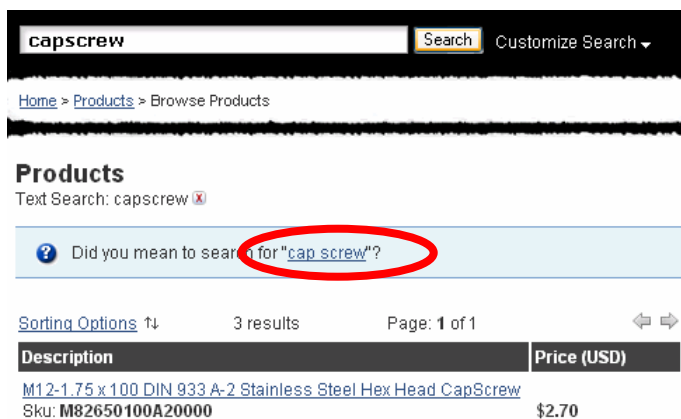

Spell Corrections Automatic

If a word is spelled incorrectly the system will automatically correct the misspelling and take you to the result you were anticipating. For example, if you accidentally type in 'Bilts' when searching for 'Bolts' you will receive the following message.

Did You Mean...

A 'Did You Mean...' correction occurs when you type in a word(s) that doesn't match anything, but there is another match closely related. Example would be if you type in 'Capscrew' the system would ask if you meant to search on 'Cap Screw'. If that is what you were meaning to search on, you can click on the 'cap screw' link provided.

You Are Here....

The 'You Are Here' feature shows a bread crumb trail of the navigation used to get to the current result set displayed. The bread crumb can contain different types of search refinements. If you are using a keyword(s), it will have the keyword(s) in the bread crumb. Similarly, category, manufacturer, and attribute filters will also show in the bread crumb as shown below. At any point in the search you have the ability to remove a filter by simply 'clicking' on the red x next to the filter in the bread crumb trail.

Search Products: By Category

Text Search: cap screw

[View All Products](#)

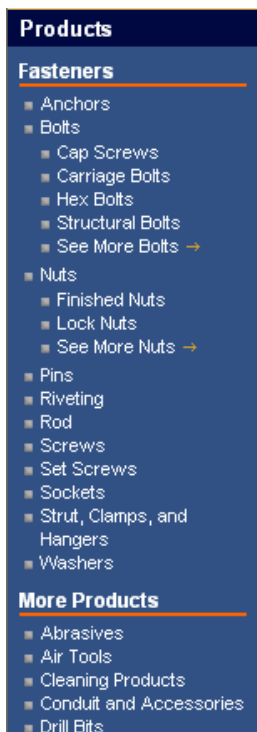

Your search matched 24487 product(s)

Fasteners

- [Button Socket Cap Screws](#)
- [Ferry Cap Screws](#)
- [Low Socket Cap Screws](#)
- [Cap Screws](#)
- [Flat Socket Cap Screws](#)
- [Socket Cap Screws](#)

Category Tree Search

If you would prefer browsing for product you can do this by using the product tree. Start by 'clicking' on a product category and continue 'clicking' down through sub-categories until you find the product you are looking for. The product tree is available on the left side of the home page as shown above or by 'clicking' on the Products menu at the top of the screen.

The most popular or best sellers categories are shown to the left, with a complete list of categories available

Limiting Result Set by Product Attributes

Once you browse to the lowest level Category, Attributes will be displayed if they are available for that category grouping. These are technical or dimensional attributes of a product useful for searching. Examples include Diameter : ½ " or Volts: 12v. Choosing an attribute will refine the search by limiting the results, to products that match the attribute value. The attributes most common to the category are in the center with remaining attributes available on the left side of the screen.

The example below refines on a diameter of 1/2".

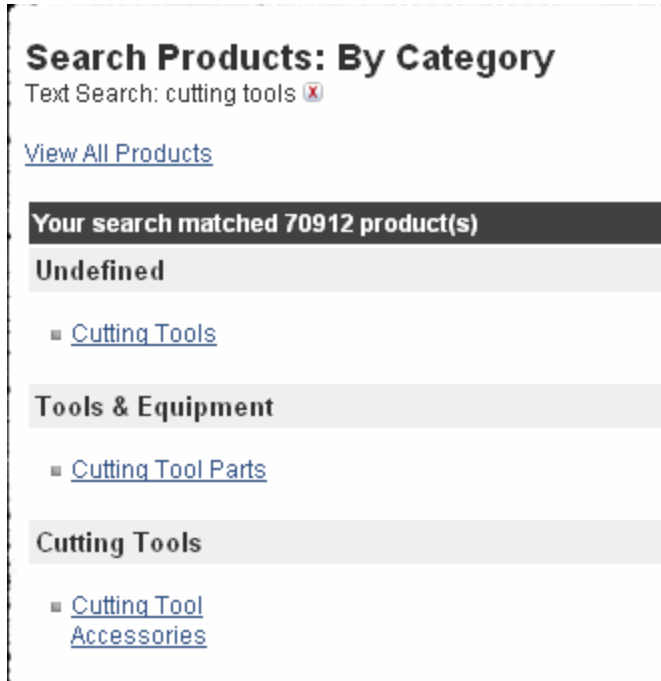

After choosing 1/2" diameter, the diameter refinement is no longer available and the result set will be filtered to contain only products with the diameter of 1/2". The result set can be further refined using the remaining attributes available.

- Thread Size**
 - 13

SKU: **53490**

The example search used for the screen shot above was 'Cutting Tools'.

Fastener Dimensional Search

The Fastener Dimensional search allows you to search using the standard notation for a fastener. An example of this would be if you were looking for a 3/8"-16 x 2 hex head cap screw. You could type 3/8" - 16 x 2 and it would bring back a list of products with a diameter of 3/8", thread size of 16, and a length of 2". The key to this searching technique is to represent the fastener's dimensions with one of the formats below. The fastener search is flexible and will recognize several different patterns.

(Diameter) – (Thread Size) x (Length)

Other examples would be:

For a fastener with dimensions of **Diameter:** 3/8", **Thread Size:** 16, **Length:** 2 1/2 "

3/8 in - 16 x 2 1/2

3/8 inches - 16 x 2 1/2

3/8-16x2-1/2

3/8" - 16 x 2 -1/2"

For a fastener with dimensions of **Diameter:** 1 1/4", **Thread Size:** 7, **Length:** 4 1/2 "

1-1/4 in -7 x 4 1/2

1-1/4 inches -7 x 4-1/2

1 1/4"-7 x 4 1/2"

Coming soon: Support for Metric and other fastener types such as Nuts.

Ordering the Product

Once you have found the item(s) you searched for, you can click on the part number to view the product detail.

The product detail screen shows specific attributes of the product such as manufacturer, image, technical specifications, page number(s) in the Fastenal catalog, and related products available.

The package quantity is also shown in this screen. The price displayed is based off package quantity. In the example below, the price is for package quantity of 900.

You can change the order quantity to the desired amount in this screen and click the 'Add to Cart' button.

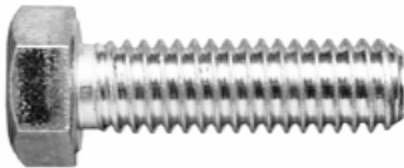

3/8"-16 x 1" Grade 5 Zinc Plated Hex Cap Screw

Fastenal.com Account Features

Once you have established a Fastenal.com user account you have access to your specific account information and features.

To access your account, click on the 'My Account' link.

Under your Fastenal.com account is eight different sections.

My Account

Account Information Company name, default currency, and billing address.	Shipping Locations Add, edit, or remove shipping addresses.	Order Requests View purchase requests made for this account.
Open Balances View open statements and invoices.	Order History A look at your past online purchases.	Order Templates Saving you time on recurring orders.
Shopping Cart View the contents of your shopping cart.	Users and Permissions Add, edit or remove users for this account.	

Account Information

The Account Information screen contains Company name, default currency and billing information. The administrator of the account has access to update this information.

Under the Currency and Registration section the administrator can choose whether new users can log in under their account.

If customer specific pricing is displayed it is displayed based off the pricing established for the customer account number in the Account Number section.

Open Balances

The Open Balance section allows you to view and print your invoices online. If you do not have this feature enabled contact your local servicing store and express that you would like to sign up for Electronic Invoicing. They will sign you up and you will receive an email containing your activation code and a link to Fastenal's Electronic Invoicing program.

You can also get to your open balances by logging into Fastenal.com using your user name and password you set up. From the Fastenal.com homepage you can click on your 'My Account' link located and go to Open Balances. Once you enter your activation code you will not be prompted for this again. You will just log into your Fastenal.com account and go directly to Open Balances.

Activation

Activate your account to view open balances.

Activation Code:

If you have not received an email containing your activation code please contact your local store.

Your information will be sent using our secure server.

If you experience connection problems, you may [try using our standard server.](#)

Once you have your activation entered, you will have access to your open invoices.

Other Services Available from Fastenal:

We offer many other services besides providing you with the finest hardware and tools we can find. To know more about a particular service, just choose one of the pictures and “click” on it!

Bandsaw Welding

Band saws customized to your specifications.
