

FUEL RECOMMENDATIONS - NONAUTOMOTIVE (Motorcycle, ATV, Kart, Snowmobile, Watercraft)

NOTE1: These recommendations are guidelines only, based on ideal conditions. The appropriate fuel for your application is subject to many variables, e.g. engine compression, outside air temp, motor temp and others. **NOTE 2:** These recommendations assume the use of fuels in off road or closed course competition only. With the exception of StreetBlaze 100, none of these fuels are legal for street use. Please consult your regional VP distribution center or VP's Tech Support group at tech@vpracingfuels.com regarding specific applications for each fuel.

FUEL >	LEADED>											UNLEADED>					Street Blaze 100
